Inventor: Duncan et al.

Confirmation No.: 7423

Serial No.: 10/661,288

Group Art Unit: 2182

Filed: September 12, 2003

Examiner: Chen

Title: Peripheral Interface System  
Having Dedicated Communication  
Channels

Docket No.: CHA920030019US1  
(IBMC-0074)

STATEMENT AS TO THE SUBSTANCE OF THE INTERVIEW

Mail Stop Amendment  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 2213-1450

Sir:

On April 23, 2007, Examiner Alan S. Chen and Applicant's representative, David Goldman, discussed via telephone, independent claims 1, 17 and 33 of the above-identified patent application. In particular, Applicant's representative inquired about the rejection under 35 U.S.C. §112, second paragraph, for the terms "near" and "low". An agreement with respect to the claims was reached and per the agreement, Applicant's representative filed an amendment on April 25, 2007, removing the word "near" from the phrase "in near real-time with low latency". Applicant's representative believes that this amendment obviates the §112, second paragraph rejection. Accordingly, Applicant's representative

requests that the Examiner reconsider and remove the §112, second paragraph rejection of claims 1, 3-17 and 19-34.

If the Examiner has any questions regarding the present patent application, the Examiner can call Applicant's attorney, David C. Goldman, at telephone number (518) 449 0044.

Respectfully submitted,

/David C. Goldman/
